Committed to becoming a
leader in power system solutions

ONE-STOP PRODUCTS
EPC FOR POWER PROJECTS
SMART O&M

Mission
More Reliable Power Supply · Safer Power Protection

Vision
Set the industry benchmark for power distribution equipment and jointly build a smart energy ecosystem

Core Values
Integrity · Diligence · Responsibility · Respect · Trust

Company Profile

Jubang Group Co., Ltd. is a provider of one-stop products + power EPC services + smart O&M power system solutions. Founded in 1993, the company has a registered capital of RMB 137.17 million. Its manufacturing base covers an area of 5.58 hectares, with 135,000 m² of standard workshops. The product portfolio includes intelligent complete switchgear, primary and secondary integrated equipment, distribution transformers, box-type substations, and power components.

In recent years, the company has continuously enhanced its capabilities in technology, branding, marketing, intelligent manufacturing, and services, and has become a qualified supplier to State Grid Corporation of China, China Southern Power Grid, PetroChina Company Limited, Inner Mongolia Power (Group) Co., Ltd., China Three Gorges Corporation, China Gezhouba Group, China Gold Group, Inner Mongolia Yitai Group, and other large enterprises.

The company has established industry–university–research cooperation with Zhejiang University, North China Electric Power University, Northeast Electric Power University, China Electric Power Research Institute, Shanghai Electrical Apparatus Research Institute, Hebei University of Technology, Hangzhou Dianzi University, and other institutions. It has obtained a total of 160 valid patents, including 35 invention patents, 45 software copyrights, and 11 provincial- and ministerial-level science and technology progress awards, and has participated in the formulation of 25 national and industry standards.

Jubang Group has been recognized as a National High-Tech Enterprise, a CNAS-accredited National Laboratory, a National Intellectual Property Advantage Enterprise, a “Little Giant” enterprise specializing in innovation by the Ministry of Industry and Information Technology, a National Postdoctoral Research Workstation, a National Green Factory, a Zhejiang Provincial Contract-Honoring and Creditworthy Enterprise, a Zhejiang Provincial Service-Oriented Manufacturing Demonstration Enterprise, a Zhejiang Provincial “Hidden Champion” Enterprise, a Zhejiang Provincial Industrial Internet Platform, a Zhejiang Provincial Green Low-Carbon Factory, a Zhejiang Provincial Specialized and New Enterprise, and a Zhejiang Provincial Third-Level Cloud Enterprise. The company holds Grade II qualification for power engineering construction general contracting, and holds, undertakes, and trials Grade III power business licenses.

Craftsmanship Creates Excellence Meticulous Quality · Customer First

Jubang Group Co., Ltd. always places customer satisfaction as the top priority. With a CNAS-accredited national laboratory, the company implements strict quality control standards, conducting full-process control from raw material procurement to finished product delivery. Guided by customer needs, Jubang integrates design, manufacturing, and testing, delivering reliable quality to support long-term customer value.

Precision Quality Control

Strict implementation of ISO 9001 Quality Management System, ISO 14001 Environmental Management System, and ISO 45001 Occupational Health and Safety Management System. Advanced quality management tools such as FMEA, PPAP, 8D, Control Plans, and Six Sigma are applied to continuously improve product quality.

Intelligent R&D Empowerment

Technological innovation is the core competitiveness of Jubang. Our R&D team is composed of highly educated and high-caliber professionals, dedicated to delivering competitive products and services and creating greater value for customers. With senior experts as technical advisors, the company has established a distinctive three-tier R&D talent structure. Through industry-university-research cooperation with domestic universities and research institutes, Jubang accelerates the transformation of R&D achievements and promotes high-quality development.

End-to-End Intelligent Manufacturing

With digital factories and intelligent manufacturing at the core, Jubang has established an efficient PLM collaborative integration platform, along with ERP and MES systems, enabling full life-cycle management of products. Seamless coordination is achieved across design, manufacturing, quality, and logistics, providing precise and efficient management at every stage of the product life cycle.

In addition, the company has introduced advanced production lines and processing equipment, including circuit breaker and RMU automated assembly and testing lines, CNC sheet metal flexible production lines, CNC turret punches, CNC laser cutting machines, CNC press brakes, CNC machining centers, and CNC spring machines. Jubang is also equipped with a CNAS-accredited national laboratory, featuring capabilities for mechanical performance, temperature rise, lightning impulse, partial discharge testing, as well as product testing and integrated management of test data.

Intelligent Electrical System

Jubang Group specializes in the manufacturing of power distribution equipment up to 35 kV and below, with a complete industrial chain covering intelligent complete switchgear, primary–secondary integrated products, distribution transformers, box-type substations, and electrical components.

The cloud platform, a flagship product of the company’s digital transformation, has been recognized as a provincial-level industrial internet platform. It integrates six core management modules—real-time monitoring, operation & maintenance management, energy management, health management, asset management, and electronic archives—and is deeply integrated with equipment to deliver comprehensive intelligent electrical system solutions.

Industrial & Civil Construction Industry Solutions

With the rapid development of the social economy, in addition to ensuring reliable power supply, energy conservation and environmental protection are increasingly emphasized. Jubang leverages its advanced intelligent cloud platform, integrating self-developed air-insulated switchgear, prefabricated low-voltage distribution equipment, intelligent circuit breakers, dual-power automatic transfer switches, and other product series.

Through real-time monitoring of power equipment operating status, maintenance costs are effectively reduced, delivering digital and intelligent solutions for industrial and civil construction sectors. Typical applications include high-rise residential communities, training bases for aviation and navigation, Geely Innovation Headquarters Building, Pinghai Ocean Science and Technology Cultural Center, and Zhongshan Power Supply Projects, among others.

Energy Industry Solutions

In response to national “dual-carbon” policies, Jubang integrates intelligent process monitoring and control technologies with independently developed oil-immersed transformers, dry-type transformers, DC circuit breakers, AC circuit breakers, and dual-power automatic transfer switches.

While ensuring efficient energy utilization, these solutions improve power supply reliability, reduce maintenance costs, and enhance user safety, delivering intelligent solutions for the new energy sector.

GT-SRM-12

SF₆ Insulated RMU (Cable Test Type)

-  High strength
High sealing
-  Standard modular
design
-  Flexible and versatile
extended design
-  Top expansion
test sleeve

1 Scope of Application

1.1 Application Scope

The GT-SRM-12 SF₆ Gas-Insulated Ring Main Unit (RMU) with Cable Test Outlet (hereinafter referred to as the gas-insulated switchgear) is a core medium-voltage power distribution product specially developed by the company for overseas markets. This product meets the requirements of overseas utilities for performing power-frequency withstand voltage tests directly on the RMU without disconnecting the cables. With advantages such as immunity to condensation, pollution, high altitude, small animals, and chemical substances—along with compact size and maintenance-free operation—it has been widely applied in power distribution systems requiring high supply reliability, including urban commercial centers, industrial zones, airports, electrified railways, metro systems, and highways.

1.2 Installation Conditions

Ambient temperature: Upper limit +40 °C, lower limit -40 °C; 24-hour average temperature not exceeding +35 °C

Altitude: Not exceeding 2000m;

Relative humidity: Daily average ≤95%, monthly average ≤90%

Seismic capability: Seismic intensity 8; horizontal ground acceleration ≤0.4g, vertical ground acceleration ≤0.2g

Note: For operation beyond the above normal service conditions, please contact the manufacturer.

1.3 Product Features

■ High-Strength, High-Sealing Fully Insulated Safety Design

The RMU adopts a fully insulated and fully sealed structure, integrating all primary circuit components inside a sealed stainless-steel gas tank filled with low-pressure SF₆ gas as the insulation medium. Incoming and outgoing feeders are connected via separable cable connectors, ensuring complete isolation from external environmental influences. The gas tank achieves a protection level of IP67. External components feature special structural designs and surface treatments, providing excellent resistance to condensation and enabling short-term flood resistance.

■ Standardized Modular Design

The product is equipped with a series of standardized functional modules, including:

- | | |
|-------------------------------------|---------------------|
| C-Load Switch Unit | P-Busbar PT Unit |
| F-Load Switch-Fuse Combination Unit | B-Cable Feeder Unit |
| V-Circuit Breaker Unit | M-Metering Unit |

These modules can be freely combined according to project requirements to form a common-tank gas-insulated RMU.

■ Flexible and Scalable Configuration

Two configuration modes are supported:

1. Non-extendable common-tank RMU, formed by combining standard modules
2. Extendable RMU units, interconnected via dedicated busbar connectors to achieve diversified unit configurations

This flexible design maximally satisfies complex power distribution schemes in different regions.

■ Top-Mounted Cable Test Channel

The RMU is equipped with an external top-mounted test compartment designed for complex cable testing operations, located above the switchgear. During cable testing, personnel do not need to directly access the cable termination, while the cable compartment remains fully enclosed, significantly enhancing operational and maintenance safety.

2 Model Designation

Note: Meaning of Extension Position Codes:

- L-Left-side outgoing
- R-Right-side outgoing
- LR-Left- and right-side outgoing
- LT-Left top outgoing
- RT-Right top outgoing
- Blank-No extension

3 Overall Dimensions

4 Technical Parameters

Main Technical Parameters of GT-SRM-12 SF₆ Insulated RMU (Cable Test Type)

Item		Unit	Load Switch Unit	Load Switch–Fuse Combination Unit	Circuit Breaker Unit
Rated Voltage		kV	12	12	12
Rated Frequency		Hz	50	50	50
Rated Current		A	630	125	630
Power-Frequency Withstand Voltage (1min)	Phase-to-Phase, Phase-to-Earth	Hz	42	42	42
	Across Open Contacts	Hz	48	48	48
Lightning Impulse Test Voltage	Phase-to-Phase, Phase-to-Earth	Hz	75	75	75
	Across Open Contacts	Hz	85	85	85
Power-Frequency Withstand Voltage of Auxiliary and Control Circuits		kV	2	2	2
Rated Short-Time Withstand Current		kA	20	–	20
Rated Short-Circuit Duration		s	4	–	4
Rated Peak Withstand Current		kA	50	–	50
Rated Short-Circuit Breaking Current		kA	–	31.5	20
Rated Short-Circuit Making Current		kA	50	50	50
Rated Transfer Current		A	–	1700	–
Rated Active Load Breaking Current		A	630	–	630
Rated Closed-Loop Breaking Current		A	630	–	630
Rated Cable Charging Breaking Current		A	10	–	15
Mechanical Endurance	Load Switch / Circuit Breaker	times	5000	5000	10000
	Disconnecter / Earthing Switch	times	3000	3000	3000
Circuit Resistance		μΩ	≤150	–	≤150
Rated Gas Filling Pressure		bar	1.35		
Annual SF ₆ Gas Leakage Rate		%/Y	≤0.01		
Degree of Protection (IP Rating)		Gas Tank: IP67, Enclosure: IP4X
